SWOT Analysis

Strong Areas: Oral Radiology stands out as the strongest area, with the highest percentage of correct answers (80.0%).

Weak Areas: Oral Surgery appears to be the weakest area, with a lower percentage of correct answers (0.0%) and a higher percentage of incorrect answers.

Opportunities: Topics *Oral Radiology* and *Dental Material* demonstrate high time efficiency scores, showing strong proficiency and potential for further mastery. This indicates efficient time management and deep understanding. Focusing on these topics can lead to advanced learning and higher scores through exploring related concepts and refining problem-solving skills.

Threats: However, *Endodontics* and *Oral Surgery* exhibit lower time efficiency scores, suggesting challenges in time management or understanding. To improve, prioritize enhancing time management skills, breaking down complex topics, and seeking additional study resources. Addressing these areas will enhance efficiency and comprehension, leading to better performance in assessments.
